## DRY EYE RELIEF

### Mild Dry Eye:

Dry eye syndrome is a common ocular surface disease in which the tear film is affected. Causes can be related to the environment (wind, sun, dust, living in high altitudes...), lifestyle (staring at screens for long periods of time, poor nutrition, eye surgery...) or physical condition (hormonal changes, aging, Sjögren's Syndrome, thyroid eye conditions...).

There are two types of dry eye: aqueous deficient and evaporative. However, about one third of patients show a combination of both, which means the signs and symptoms often overlap.

Dry eye symptoms include watery eyes, pain and redness, blurred vision, stinging or burning of the eye, and sandy or gritty feeling.

### D.E.R.M.™ FOR MILD DRY EYE RELIEF

The Dry Eye Relief Mask, D.E.R.M.™, is our moist-heat compress for mild dry eye. The mask contains Silica beads which naturally attract moisture from the air and release it when microwaved. Heating the mask for 20 seconds will provide soothing moist-heat relief for 4-6 minutes. We supply complimentary samples of liners with the D.E.R.M. which can be moistened and applied to the mask prior to heating to extend the treatment to 7-9 minutes. D.E.R.M.™ is hypoallergenic and can also be used to create cold therapies for allergy relief.

## TRANQUILEYES® WITH BEADS & INSTANTS FOR MODERATE DRY EYE RELIEF

The new tranquileyes® Advanced kit with Beads & Instants provides at least 510 controlled moist-heat treatments, scientifically proven to provide relief from moderate dry eye\*.

The patented tranquileyes® eye hydrating therapy is doctor-recommended and scientifically proven to relieve dry eyes. Give yourself a soothing 12 to 15 minute compresses which sustain optimum humidity and temperature (between 102-109° F) that industry studies have shown provide immediate and long-term relief from **moderate** dry eye.

The beautifully sculpted eyecups are made from medical grade thermal plastic and memory foam. Extremely comfortable for sleep, tranquileyes® patented technology is a popular choice for aqueous deficient dry eye as well as patients with Sjögren's syndrome and other systemic dry eye. The masks can also be used to create cold therapies for eyelid puffiness, itchiness, and migraine headaches.

Interchanging thermoeyes® Beads and thermoeyes® Instants allow you flexibility in choosing the treatment type that best works with your day.
