EASI VIEW NECK MAGNIFIER

Description: Large rectangular low 1.7X magnifier with 145 by 105mm lens.

Purpose: A useful magnifier with adjustable length cord enabling it to be suspended around the neck, leaving hands free to hold material.

Features: A flat round edged magnifier that can be held at any angle.

CLEAR VIEW STAND MAGNIFIER

Description:	Tilting rectangular lens on a metal wire stand offering 1.7 times magnification.
Purpose:	Hands free magnification for use when working or reading on a table. It has no light and the stand is light weight.
Features:	This lens sits on a light-weight stand and can be used as a general magnifier.
Dimensions:	The aspheric 1.7X lens measures 140mm by 100mm.

WINDSOR HAND HELD MAGNIFIER

CODE: 5248 : 70mm with 2.6x magnification

CODE: 5249 : 98mm with 2.3x magnification

BRIGHT FIELD MAGNIFIERS

2 TYPES

Looks like a paperweight, acts like a reader. Dome magnifiers illuminate reading material without any batteries or bulbs using their light gathering optical engineered dome shaped precision lens. This lens gathers ambient light and focuses it in the centre to brighten your reading material. These dome magnifiers glide easily across any surface for strain-free enlargement of fine print.

5850 : ORIGINAL BRIGHT MAGNIFIER : 40 mm 1.7x magnification/18.9 dpt

5850/02 : VISUAL TRACKING MAGNIFIER : 40mm 4.4x visual tracking magnifier
