MZV100	2x magnification	100mm diameter lens round

Magnipro –

3x Dimmable Anti-Glare LED Magnifier (MZED12)

Key Benefits of our SMD LED Lights

- Provide more even lit viewing area
- 35% Brighter and consume less power/energy than traditional LEDs
- 2X longer life span (50,000+ hours) than traditional LEDs
- Anti-Glare and relieve your strain eyes

▶ Professional Quality Magnifying Lenses

Made of scratch resistant, shatterproof fresnel lens provides crystal clear and distortion-free image designed for people with low vision, seniors, hobbyists and professionals.

▶ The Perfect Lens For Any Task

The 3X magnifying lens is ideal for reading and inspection, and examining small texts, images, and objects.

▶ Large Evenly Lit Viewing Area

Wide rectangular magnifying lens shape the way we naturally read, it's ideal for reading books, newspaper and magazines and due to it's large viewing area(4.5 inch by 7 inch)you will enjoy minimal hand movement above the objects.

▶ Illuminate While You Magnify

Equipped with 12 powerful, energy-efficient SMD LED lights built into the frame. The lights are perfect for nighttime book reading and use in low light condition. The lights run on three AAA batteries; a new set of batteries can last for months without changing because of its energy efficiency

Large 4.5 inch x 7 inch magnifying lens

3x Page Magnifier Anti-Glare LED (MZ1815)

Magnifies Up To 3X

Crystal Clear Image & Evenly Lit Viewing Area

THE MOST COMFORTABLE LIGHTING SYSTEM FOR YOUR EYES: This led magnifier is equipped with 12 anti-glare SMD led lights, which provide more evenly lit area than traditional LEDs, lighting does not focus on one point rather scattered within an area.

★ **LARGE VIEWING AREA WITH CRYSTAL CLEAR LENS:** Optical grade magnifying lens covers large viewing area without having your hands to move all the time, lens(viewing area) is measured 4.5"x 7" and magnifies up to 300%. "

★ **12 ENERGY EFFICIENT SMD LEDs CONTROLLED BY DIMMABLE SWITCH:** Our SMD LEDs are designed to last 50,000+ hours not only provide more evenly lit and brighter viewing area but consume less power than traditional LEDs so a new set of batteries would last longer.

★ **LIGHTWEIGHT & ERGONOMIC DESIGN:** The unit itself only weights 7 ounces, and the grip of this LED magnifier is ergonomically designed for most hands, therefore, ideal for long reading time.

★ **BRIGHTER & BETTER FOR YOUR EYES:** 35% brighter than traditional leds while consume less power/energy, new set of batteries will last longer.
